

THE CAMELBACK

A contemporary southwest interpretation of the Adirondack. Named after our famous valley peak. Still made with the warmth of wood, but with a steel frame that won't wiggle out of shape. It's also, easier to get out of with a softened seat angle of 12°, rather than the Adirondacks' 26°.

FEATURES

14 GAUGE STEEL FULLY WELDED
AND GROUND SMOOTH

CHOICE OF POWDER COAT COLOR
